BELLEVUE, WASHINGTON

TERMS OF SALE

All prices are F. O. B. Bellevue, Seattle or other Pacific Northwest shipping points.

No charge for cases or packing.

All orders subject to prior sale and part delivery in case of partial or entire crop failure, or if for any reason beyond our control full delivery cannot be made.

Payment—15% cash with order, balance on delivery.

Discounts—5% cash discount for payment in full with order. On large orders of 5,000 or more bulbs of the same class, special quantity discounts will be allowed.

Shipment will be made as soon as possible after crops are harvested. Narcissus bulbs are shipped by freight. On large shipments, when orders are placed sufficiently in advance, we can guarantee car-load freight rates to Chicago and New York. All other bulbs are shipped by express, unless otherwise instructed. Bulbs take second class express rate.

GUARANTEE. We endeavor to send out nothing but the very finest bulbs obtainable. We guarantee all bulbs to be true to name and will gladly replace any that prove otherwise. We give no warranty, however, expressed or implied, and will not be responsible in any way for the results of planting, forcing, or flowering of any bulbs or roots we send out. Complaints or claims about the quality of goods will be entertained only when made immediately after receipt of the goods. In no event will we be responsible for more than the invoice price of said goods.

BULBOUS IRIS

As a cut flower, the Bulbous Iris is fast taking its place as one of the most popular and profitable items for the Greenhouse. The flowers are phenomenal keepers and shippers, blooming at a time of year when flowers are in demand at good prices.

Under glass, the Tingitana Hybrids may be brought into flower during December and January; the Dutch during February and March; and the Spanish during March and April.

For a continuation of blooms during the latter part of April, May, and the first part of June, the Dutch and Spanish may be planted in cold frames or outside.

For early forcing we recommend top size bulbs. For slower inside growing second size bulbs may be used. The smallest size bulb is suitable for cold frame or outside growing and, because of the low price, growers should find these very profitable.
